PROJECTS

Weather Website

September

- A real-time weather forecasting web application that provides users with up-to-date weather information based on their location or a searched city. Integrated OpenWeatherMap API to display real-time weather data using HTML, CSS, JavaScript, react.js and responsive design.

2024

generate_QR_code Website

June 2024

- A dynamic Text-to-QR Code generate website that allows users to easily convert any text or URL into a scannable QR code. This project demonstrates my skills in web development, JavaScript, and API integration to create an interactive and user-friendly experience.

Creative Creation Website

April 2024

- This is a prototype design. In this website users can create a banner, business card, invitation card, Blog etc.
